Stocks not in NSE Nifty 50:

There are two kinds of risks: systematic and diversifiable. Systematic risk is non-diversifiable. Beta is a measure of systematic risk which cannot be reduced by diversifying portfolio.

Beta value of 1 is considered market average and beta values more than one are considered riskier than market average. In this example, index stocks Sun Pharma, Wipro, Reliance, Maruti, Adani Enterprises and Axis Bank exhibit beta values greater than 1.
